**Milara, Inc.** has purchased the Brooks Equipe atmospheric product line.

**Milford, MA - September 20, 2013** The Massachusetts-based Milara, Inc. has purchased the Brooks Equipe atmospheric product line. The Brooks Equipe products being acquired by Milara include the atmospheric AXM and DBM robots, Pre-Aligners, Tracks and Controllers. As part of the agreement Brooks will retain Equipe atmospheric product repair capabilities and continue to support existing and new repair business.

Milara, Inc. is headquartered at 4 Marc Rd, Medway, MA 02053, and is a leading supplier of semi automatic and fully automatic inline printers, wafer bumping and wafer printing equipment. Milara will add the Equipe atmospheric robotics from this acquisition to their existing Diamond Series atmospheric product line further expanding their atmospheric automation capabilities and products.

Brooks will execute all existing orders at the time of this announcement. Brooks will also continue to support the current warranty obligation that exist at the time of this announcement and for product shipped by Brooks after this announcement.

To ensure continuity of product quality and delivery, Milara will utilize its own resources as well as Brooks' Equipe contract manufacturers for product deliveries while optimizing the long term manufacturing strategy. All new orders should be issued to Milara, Inc. at the following address:
